

Objective

The objective of this project is to provide a comprehensive visualization of the FIFA World Cup results from 1930 to 2014. This dashboard highlights key statistics, historical performances, and trends, offering insights into the teams' achievements, hosting countries, and competition statistics.

Steps Followed

1. Data Gathering

- **Sources:** The data was sourced from official FIFA records and historical archives.
- **Data Import:** Imported raw data into Tableau for visualization and analysis.

2. Data Cleaning

- **Error Removal:** Removed any discrepancies and errors in the data entries.
- **Standardization:** Standardized country names, team names, and other categorical data for consistency.
- **Date Formatting:** Ensured all dates were in a consistent format to facilitate time-series analysis.

3. Data Processing

- **Calculated Fields:** Created calculated fields for key metrics such as total finals, semi-finals appearances, and World Cup qualifications.
- **Data Aggregation:** Aggregated data by year, country, and team to enable comprehensive analysis.
- **Filtering:** Applied filters to isolate specific datasets like hosting countries, winners, and competition statistics by year.

4. Data Analysis

- **Visual Representations:** Developed a range of visualizations including bar charts, line charts, maps, and tables to represent various metrics.
- **Key Metrics:** Focused on key metrics such as the number of World Cup wins by country, teams' performances in finals and semi-finals, hosting countries, and
